MECHANICAL FEATURES
Tests on specimen: $R_s = N/mm^2$ 270 Yield Stress $R = N/mm^2$ 428 Tensile Strength
Specific tests:

certificati_web.cdr

Permissible working load limit (WLL) at straight lifting
in metric tons (decimal point is comma)

90°

t. 3,2

Permissible working load limit (WLL) at 45° (for 2 pieces) in
metric tons (decimal point is comma)

45°

t. 2,3

We confirm that above mentioned materials have been manufactured, tested during manufacturing and final inspected according to applicable specifications, to the EC directive and customer requirements. Materials are conforming.
